Work History

Oct 2021— Current

Sr. Full Stack Developer

Recharge CT, USA (Remote)

- Design, code & host scalable internal & external tools
- Architected company's first public ETL tool to improve customer migration time & experience
- Created and maintain an internal site that drastically decreased merchant data migration duration & complexity
  - Up to a **45x** speed improvement compared to previous tools
  - Tech: Flask, FastAPI, React/Next.js, Redis, SQL, Docker, GCP
- Manage relevant cloud infrastructure including serverless apps, VPSs, SQL & Redis
- Write migration scripts to assist with complex data migrations & remediation projects for largest merchants on platform

Jun 2022— Feb 2024

Sr. Frontend Engineer - React

Mythic Digital NC, USA (Remote | Contract)

- Won Web Excellence Award for Colorado Avalanche Information Center website redesign
- Create reusable, interactive & accessible React components, responsive at any screen size
- Accurately render designs & user stories into functional components
- Provide feedback & expertise on configuration of frontend tech stack
- Leverage & keep current with rapidly changing frontend tech
- Work in agile team to estimate, split & distribute user stories
- Provide live demos of component functionality to clients for feedback

Oct 2020— Oct 2021

Technical Migration Specialist

Chargify / Maxio Deerfield Beach, FL (Remote)

- Responsible for importing **>$15M** merchant ARR in first 12 months with company
- Ramped quickly on API-driven product to serve as subject matter expert on data migration projects, including analyses of data files, formats & platform validation
- Performed scripted data migrations, handling complex formats and platform-to-platform translation challenges
- Developed internal website to reduce data formatting times & provide revenue insights
- Learned Ruby, React.js & some Rails to more easily interface with Product / Development teams on product gaps & bugs

↓

Feb 2016— Oct 2020

Tier 2 Technical Support Specialist

S Sage Outsource Solutions Pompano Beach, FL

- Led Tier 2 support team as subject matter expert on many LogMeIn & formerly CitrixOnline products (LogMeIn Pro & Central, Hamachi, GoToMyPC, GoToMeeting, etc.)
- Worked with software development team on reported errors & bugs on newly released software & assisted in deployment of release fixes
- Learned C# to develop GUI application to quickly analyze & understand complex log files
  - Cut required log-analysis training from **weeks to days**
- Created internal site to facilitate Tier 1 to Tier 2 escalations, provide troubleshooting steps, & assist with preliminary log analysis
